EDUCATION

Dr. A.P.J. Abdul Kalam Technical University

Bachelor of Technology, Computer Science

Lucknow, India

2019 – 2022

Jamia Millia Islamia

Diploma in Computer Engineering

Delhi, India

2016 – 2019

EXPERIENCE

Software Engineer III

Apr 2024 – Present

Thales, Noida

- Architected and delivered full-stack In-Flight Entertainment (IFE) platforms and onboard advertising solutions for Spirit Airlines, Delta Air Lines, Emirates, and Air India, focusing on scalability, reliability, and seamless content delivery.
- Led the architecture and development of a microservices-based content ingestion platform using Java, Spring Boot, and REST APIs, enabling rapid airline onboarding, independent service deployment, and enhanced system scalability and maintainability.
- Developed responsive React and TypeScript frontends optimized for low-powered seatback hardware and intermittent connectivity, improving passenger-facing UI performance by 30%.
- Engineered scalable Jenkins CI/CD workflows, cutting deployment time by 65% and enhancing build stability, release reliability, and deployment automation.
- Championed engineering best practices through rigorous code reviews and architecture design reviews, driving higher code quality, maintainability, and developer productivity across cross-functional teams.

Software Engineer II

Apr 2023 – Apr 2024

Thales, Noida

- Contributed to the IFE OTT platform across the full stack, developing Golang REST APIs alongside React/TypeScript frontend features.
- Established coding standards and led architectural governance initiatives through peer reviews, improving codebase maintainability by 40% and reducing technical debt.
- Collaborated in Agile/Scrum ceremonies including sprint planning, standups, and retrospectives within a distributed engineering team.

Software Engineer I

Aug 2022 – Apr 2023

Thales, Noida

- Built modular, reusable UI component libraries in React, TypeScript, and Storybook to standardize design patterns across IFE platforms.
- Championed test-driven development (TDD) practices using Jest and React Testing Library, driving a 75% reduction in production bug rates over subsequent quarters.
- Identified and resolved performance bottlenecks through profiling and targeted refactoring, reducing page load times by 30%.
- Partnered with UX designers to ensure pixel-accurate, accessible implementations across diverse screen sizes and hardware configurations.

PROJECTS

Conference Management Toolkit | *React, TypeScript, Node.js, Express, MySQL, Prisma* | [Live Demo](#)

- Designed and built a full-lifecycle academic conference platform covering paper submissions, peer review assignments, reviewer bidding, and chair decisions
- Architected a RESTful API with 100+ endpoints and 17 relational database entities modeled with Prisma ORM and MySQL
- Integrated Razorpay for tiered payment processing, AWS S3 (with local fallback) for file storage, and Nodemailer for transactional email notifications
- Implemented real-time status updates via Socket.io and containerized the full stack with Docker for consistent deployment

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, Golang

Frontend: React, Redux, Next.js, Tailwind CSS, Material-UI, Storybook

Backend & APIs: Node.js, Express.js, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, RESTful APIs, Firebase

Testing: Jest, React Testing Library, Cypress, Percy

Databases: MySQL, MongoDB, Firebase

DevOps & Cloud: Docker, Kubernetes, Jenkins, CI/CD Pipelines, AWS S3

Tools & Methods: Git, Agile, Scrum, Microservices, System Design
