EDUCATION

Dr A.P.J Abdul Kalam Technical University

Bachelors in Technology, Computer Science

Noida, India

2019 – 2022

Jamia Millia Islamia

Diploma in Computer Engineering

Delhi, India

2016 – 2019

EXPERIENCE

Software Engineer II

Apr 2023 – Present

THALES

Noida, India

- Led full-stack development of Airlines' In-Flight Entertainment (IFE) OTT platform using **React.js** and **Next.js**, serving thousands of daily passengers with scalable microservices architecture
- Architected **event-driven microservices** using **Golang** as backend with message queues, integrating **RESTful APIs** for seamless data exchange across distributed systems
- Implemented robust database solutions using **PostgreSQL** and **MongoDB** for data persistence, with **Redis** caching layer to optimize performance and reduce API response times by 45%
- Established **CI/CD** pipelines using Jenkins and containerization with **Docker**, deploying microservices that reduced deployment times by 65% while maintaining 99.9% uptime
- Maintained 90%+ test coverage through comprehensive testing strategy using **Jest** and **Cypress**, ensuring high-quality code delivery in **Agile** development cycles

Software Engineer I

Aug 2022 – Apr 2023

THALES

Noida, India

- Developed responsive web applications using **React.js** and **Next.js** with **TypeScript**, creating reusable component libraries that accelerated development velocity by 30%
- Built and consumed **RESTful APIs** using **Node.js** and **Express.js**, implementing efficient data flow patterns and error handling mechanisms for robust backend services
- Integrated **PostgreSQL** and **MongoDB** databases with optimized queries and indexing strategies, improving application performance and reducing data retrieval times by 35%
- Collaborated in **Agile** development methodology with daily standups, sprint planning, and retrospectives, ensuring timely delivery of features while maintaining high code quality standards

PROJECTS

School Management System | *React.js, Next.js, Firebase, TypeScript, RESTful APIs*

- Built a comprehensive school management application using **React.js** and **Next.js** with student registration, QR code ID card generation, and automated report card system
- Implemented **Firebase** Authentication and **Firestore** for real-time data synchronization, creating scalable backend architecture with **RESTful API** endpoints
- Designed Excel-style interface for bulk report card creation with automatic grade calculations, ranking, and professional print-ready templates using **TypeScript** for type safety

Real-time Chat Application | *React.js, Next.js, Firebase, WebSocket, Event-driven Architecture*

- Developed real-time messaging application using **React.js** and **Next.js** with **event-driven architecture** for instant message delivery and user presence tracking
- Integrated Google authentication and **Firebase** backend services, implementing **WebSocket** connections for real-time communication with message persistence

TECHNICAL SKILLS

Frontend Frameworks: React.js, Next.js, Vue.js, Material-UI, Tailwind CSS, TypeScript

Backend & APIs: Node.js, Express.js, RESTful APIs, Microservices, Event-driven Architecture

Programming Languages: JavaScript, TypeScript, Golang, Python, Java, C/C++

Databases: PostgreSQL, MongoDB, Redis, Firebase

DevOps & Tools: Docker, Git, Jenkins, WebSocket

Methodologies: Agile, Test-Driven Development, Code Reviews
